128

The President's Budget for FY 2022 supported 128 FTEs, however, the Commission will be adding resources to create a lasting capability to focus on supply chain issues with the funding provided with the FY 2022 Appropriations. The additional staffing, as compared to the FY 2021 staffing levels, will be applied to Commission enforcement actions, efforts to preserve competition in the industry, initiatives focused on the supply chain that are within the authority of the Commission, as well as the capability to provide timely informational and dispute resolution assistance to consumers, as well as administrative resources in the areas of human resources, information technology, and others would provide necessary support to the increased staffing and activity.
