Subject: Re UPS petition

It would be improper and *against* basic *ideals* of business in the United States to grant an exemption based on the size of the company. If UPS wants to change the law then the law should be changed for every company in the same business. By granting one company this privilege and not allowing smaller companies to do the same with their customers would simply be unfair and would restrict competition. UPS in effect wants to Wal-Martize the NVO business.
