* CL - "Closely Associated" to Inherently Governmental Functions – Closely Associated functions are functions that are generally not considered to be inherently governmental but are closely associated with the performance of inherently governmental functions.

Work that is close to inherently governmental because of the nature of the function. If contractors used to perform this work, agencies must give special management attention to the contractors' activities to guard against their expansion into inherently governmental functions.

CT - "Critical Functions" - Critical function means a function that is necessary to the agency being able to effectively perform and maintain control of its mission and operations. Typically, critical functions are recurring and long-term in duration. Work is performed by Federal employees or private sector contractors once the agency has sufficient internal capability to control its mission and operations

OT - "Other Than" - Work which can be performed only by private sector contractors.
